I am a Junior Web Developer and a new student of Politeknik Elektronika Negeri Surabaya first semester, study program of Distance Education Informatics Engineering. Having good experience in the field of Administration and Information Technology, the skills mastered include website development, UI/UX design and data analysis. Dedicated to study hard and develop myself in the field of technology and information to benefit the surrounding.

EXPERIENCE

Remote Freelance, Mojokerto Feb 2023 - Present

Jetis, Mojokerto
Web Developer

- Serve clients in creating specific websites according to their needs.
- Create a dynamic website UI/UX design using React.js and TailwindCSS technology.
- Develop the Back-end side of the website using Node.js technology and pay attention to system scalability.
- Implement REST API to integrate and simplify data exchange between the Back-end and Front-end sides of the Website.
- Assisted as ui/ux implementor in the QRIS Jelajah Indonesia web project using react.js and tailwind (without API integration) and before the revision and further development process.
